**Subject:** URGENT MEDIA COMMUNITY ISSUE

It came to our attention this afternoon that one of the teams assessing Superfund sites found out that residents tampered the well in Caguas Hormigas Superfund site and are using it to extract water. The winds took out all signs in this Superfund sites. Upon making a few phone calls we found that in the wells in Dorado Superfund site water was extracted on Friday, Saturday and Sunday and our CDM contractor confirmed that a resident of Maunabo had requested to use the water at the wells in the site.

Yesterday I had told CEPD Director that my most pressing concern was the use of water in the San Germán Superfund site where we have an unknown number of wells that were dugged in 1975 after Hurricane Eloise, when residents were without water for many months. These Superfund sites have VOC's and are at different stages in the process.

I strongly suggest we make a media pitch on radio and print with CEPD director urging people no to tamper these wells or use that water, work to have signs up ASAP, make flyers that can be distributed house to house and within the communities and the neighborhoods. This is an URGENT matter.

Please contact Carmen and/or myself.
